

KATHIRVEL P

kathirvel.p2006@gmail.com — +91-8637684914 — [LinkedIn](#) — [GitHub](#)

Professional Summary

Aspiring Software Engineer and Full Stack Developer with strong skills in Java, Python, JavaScript, Spring Boot, React JS, Flutter, and MySQL. Experienced in building scalable web, AI-enabled, and enterprise applications with a focus on performance, security, and user experience. Possesses solid problem-solving ability, adaptability, and a continuous learning mindset, committed to delivering high-quality software solutions in professional environments.

Education

B.Tech – Computer Science and Business Systems

V.S.B Engineering College, Karur | 2023 – 2027

CGPA: 8.39 / 10

Higher Secondary (XII)

Government Boys Higher Secondary School, Musiri | 2023

Percentage: 81.33%

Technical Skills

Languages: Java, Python, JavaScript, Dart

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Spring Boot, REST APIs, PHP

Database: MySQL, PostgreSQL

AI/ML: Machine Learning, Generative AI, Prompt Engineering, Computer Vision, Google Gemini AI

Tools: Git, GitHub, Docker, VS Code, XAMPP

Core: Data Structures, Algorithms, OOPS, DBMS, Software Testing

Projects

AIVONITY – Intelligent Vehicle Assistant Ecosystem

Tech Stack: Flutter, FastAPI, Machine Learning, PostgreSQL, Docker, Kubernetes

- Engineered AI-powered vehicle health platform with real-time telemetry monitoring and predictive maintenance algorithms.
- Architected conversational AI for intelligent scheduling and deployed scalable cloud infrastructure via Docker and Kubernetes.

Exam Hall Allocation Management System – Full Stack Web Application

Tech Stack: PHP, MySQL, JavaScript, Bootstrap

- Developed and engineered web system automating exam hall allocation for 500+ students with smart seat management and real-time tracking.
- Implemented role-based authentication reducing manual allocation effort by 80% with secure automated report generation.

Java Search Engine – Advanced Web Search Platform

Tech Stack: Java, Swing, Web Crawling

- Engineered Google-like search engine with Boolean queries, relevance ranking, and real-time web search capabilities.
- Designed smart word suggestion system and optimized keyword indexing improving retrieval speed by 60%.

JeduAI – Smart Learning & Assessment Platform

Tech Stack: Flutter, Dart, Google Gemini AI

- Created and architected AI-powered educational platform with automated assessments serving 100+ users with real-time tutoring and multilingual support.
- Designed role-based portals for students, staff, and administrators using Google Gemini AI integration.

Internship Experience

Brainery Spot Technology – Full Stack Web Development Intern

June 2024 – July 2024

- Engineered frontend and backend components for web applications using React, Spring Boot, and MySQL.
- Designed and built REST APIs for real-time data processing, reducing response time by 40% via Git/GitHub collaboration.

Certifications

Artificial Intelligence: Concepts and Techniques – NPTEL (IISc Bangalore) | Java Full Stack Developer – Infosys Springboard

Prompt Engineering for Developers – Infosys Springboard | Foundations of Project Management – Google (Coursera)

Salesforce Agentforce Champion – FutureSkills Prime / NASSCOM | Java (Basic) – HackerRank

Achievements & Activities

Solved 155+ LeetCode problems (Java) with 69-day coding streak | Active GitHub contributor with full stack and AI projects

Participated in Tata Crucible, Tata Imagination Challenge, and national-level technical competitions

Professional Strengths

Scalable Application Design | AI-Integrated Development | Clean Code & Architecture | Problem Solving & Debugging | Agile Practices | Leadership & Team Collaboration
